

TEXAS CAPITAL BANK

Dallas, Texas

FSG completed an infrastructure cabling installation for Texas Capital Bank in Dallas, Texas.

Owner

Texas Capital Bank

Contract Type

Technology

Electrical Contractor

FSG

CHALLENGE

The FSG Technology team was called upon by Texas Capital Bank for a complete low voltage/structured cabling infrastructure installation at their new headquarters in Dallas, Texas.

SOLUTION

FSG installed a complete Panduit-certified warranted solution with interconnecting copper and fiber backbones between floors in redundant pathways. A total of 2,280 cat6 cables were installed. FSG provided, installed, and terminated the CATV RG6 coaxial application for conference rooms. This project was proposed through ACUITY Consulting Group against eight other vendors. Later, FSG was awarded the move of the operations department, consisting of three floors in the office space, along with the build out of the data center. This work was completed within a two-month time frame.
