

BRIDGELAND HIGH SCHOOL

Cypress, Texas

CHALLENGE

FSG understands that getting the project designed correctly, in the beginning, helps ensure that the project gets built the right way in the end. Safety, efficiency, and professionalism are just a few things to expect from us. We bring our safety record, innovative solutions, and well-trained teams to every project. Our experience and knowledge gained over the course of many years have allowed us to learn the best practices and then repeat those practices time and time again.

SOLUTION

Bridgeland High School is a 570,000 square foot state of the art high school that features a four-story academic wing, collaboration spaces, community building for fine arts, auditorium, agricultural shop, auto shop, childcare center, cosmetology, indoor athletics space including three gymnasiums, natatorium, kitchen, and central plant. In addition to the main building, the project included sports lighting for a football field, baseball field, softball field, and tennis courts. Bridgeland High School is the 12th high school in the Cypress-Fairbanks Independent School District. CFISD is the 3rd largest district in the state of Texas. Bridgeland H.S. is one part of the district's 120 acre multi-campus educational village which also includes Wells Elementary school and a future three-story middle school.
