SANDIA RESORT & CASINO

Albuquerque, New Mexico

Lighting Inventory Management

CHALLENGE

In 2009 FSG assisted Sandia Resort & Casino in finding solutions to save energy and maintenance costs. At the time, the customer was using an inventory management system with another distributor. Because of FSG's presence in the market place and ability to provide inventory management to our customers, it was a no brainer for Sandia Resort & Casino to switch to FSG's services.

SOLUTION

FSG set up an inventory control system which involves determining minimums and maximums of various items the customer uses. In addition, FSG visits the customer on a weekly basis to ensure inventory levels are correct and assist them with retrofitting their entire property to LED.Â
