Village of Corrales

Contract Type

Government

Contract Amount

\$22,000

Energy Savings

\$3,500

Number of Fixtures Replaced

83

Annual kWh Reduction

25,500

CHALLENGE

Corrales is a village in Sandoval County, New Mexico, located along the Rio Grande River. When The Village of Corrales wanted to update the lighting at their Senior Center, they reached out to FSG to upgrade the interior and exterior lighting. In addition to wanting to improve the overall look and feel of the facility, there were also concerns about the safety and security of the community due to dim parking lot lighting.

SOLUTION

FSG addressed these concerns by replacing outdated fixtures with new, high-efficiency 2x4 lay-in and wrap around fixtures in the interior, and installing new exterior wall packs on the building. FSG also installed new exterior lighting in the parking lot. This update lowered the customer's utility bill by \$3,500 a year and resulted in an annual energy savings of 25,500kWh, while also keeping light levels high to create a safer environment for members of the community.
