

TOWN OF DOVER

Dover New Jersey

Decorative LED Streetlight And Pole Replacement

CHALLENGE

Dover is a town in Morris County, New Jersey. Located on the Rockaway River, Dover is about 31 miles west of New York City. The Town wanted to update the lighting in their downtown area to more historical fixtures and poles that also utilized LED technology and were more efficient. The poles and fixtures they decided on were made to order, with an 8 week lead time. Budget money was approved in the summer, and the town also desired to have the new lighting system installed in time for the installation of Christmas lighting right after Thanksgiving. With a tight timeline, the town turned to FSG for assistance.

SOLUTION

FSG offered a Cooperative Purchasing Solution to the town that helped save time and money, streamlining the process. FSG holds several national and local COOP contracts for municipal customers throughout the United States that cover the design, supply, and installation of outdoor lighting. FSG supplied and installed 53 Holophane Steetscape decorative poles and 100 GlassWerks Bern LED fixtures.

RESULT

All fixtures and poles were installed in time for holiday decorations. Michael Hantson, Town Engineer, Planner & Zoning Officer stated that FSG performed in an exceptional manner establishing and maintaining a schedule to meet the Town's requirements. Overall he stated the project performance exceeded the Town's expectations.
