CHALLENGE

Highland Park United Methodist Church envisioned the Tolleson Family Activity Center as a dynamic space for worship, learning, and fellowship. To bring this vision to life, general contractor Rogers-O'Brien needed a reliable electrical contractor capable of handling a complex Design/Assist project with high-end finishes and intricate technical requirements. FSG was selected as the trusted partner to provide ground-up electrical construction, lighting, audio/visual, and data installation.

SOLUTION

Spanning multiple levels, the project included a two-story underground parking garage, classrooms, meeting spaces, and a worship center. FSG worked closely with the architect and project team to integrate seamless electrical and lighting solutions that complemented the facility's striking design. With a focus on precision and efficiency, FSG ensured that all power, lighting, and technology systems met the church's operational and aesthetic expectations.

RESULT

Through expert execution and collaboration, FSG helped transform the Tolleson Family Activity Center into a fully functional and beautifully illuminated space that will serve the Highland Park community for years to come. By delivering quality electrical and lighting solutions, FSG reinforced its reputation as a trusted partner for complex, high-profile projects.
