### ELECTRICAL CONSTRUCTION CASE STUDY

FSG Delivers Expert Electrical Construction for Cash America Data Center

#### Owner

Cash America

#### Contract Type

Electrical Construction

#### Contract Amount

\$2,320,000.00

#### CHALLENGE

When Cash America International, a leading provider of specialty financial services, set out to develop a mission-critical data center in Fort Worth, Texas, they knew the project required a partner with deep technical expertise and a proven track record in complex electrical construction. With operations spanning over 900 locations in 20 states, reliability and performance were non-negotiable.

#### SOLUTION

FSG was selected to take on the \$2.32 million electrical construction project, leveraging the capabilities of its Dallas branch. The team brought precision, coordination, and deep knowledge of data center requirements to the job site, ensuring that power systems, infrastructure, and installation met the high standards necessary for continuous uptime and operational resilience.

#### RESULT

FSG completed the project on time and to the full satisfaction of the client, delivering a robust electrical system designed to support Cash America's growing technology needs. The successful execution not only reinforced FSG's reputation in data center construction but also provided Cash America with peace of mind in the reliability of their critical infrastructure.
