FSG

LIGHTING CASE STUDY

The Four Seasons Hotel in Baltimore, Maryland, desired to upgrade the lighting throughout their hotel.

CHALLENGE

The Four Seasons Hotel in Baltimore, Maryland, desired to upgrade the lighting throughout their hotel. They were also keen to take advantage of rebates offered by their utility company for embracing new technology. As experts not only in lighting installations but also rebate management, Facility Solutions Group was equal to the task.

SOLUTION

This 441,000 square foot hotel opened in 2011 utilizing incandescent lighting for aesthetic reasons. Ownership turned to FSG to see if LED was a possibility. FSG experts audited the present lighting and designed a new system centered around LED technology. The FSG solution included seven different LED lamps from four different manufacturers. With a \$186,000 rebate and savings of over \$70,000, this project paid for itself in under seven months.
