

HUNTERDON MEDICAL CENTER

Flemington, New Jersey

LIGHTING CASE STUDY

FSG was called on to perform a comprehensive lighting upgrade to both improve the quality of light in the hospital, as well as improve energy efficiency.

CHALLENGE

Hunterdon Medical Center, located in Flemington, New Jersey, is a 176-bed private hospital. They called upon FSG to perform a comprehensive lighting upgrade to both improve the quality of light in the hospital, as well as improve energy efficiency.

SOLUTION

FSG Electric audited the hospital's existing system, and designed a turnkey retrofit project. The scope of the project covered 3,000 fixtures, and included reflector kits, compact fluorescent lamps, new LED exit signage, and vending machine controls. This project also included several lighting control measures, such as occupancy sensors and daylight harvesting controls.
