

JAIME D. PADRON ELEMENTARY SCHOOL

Austin, Texas

ELECTRICAL CONSTRUCTION CASE STUDY

FSG provided turnkey electrical construction services from design to punch list.

CHALLENGE

When Austin ISD built Jaime D. Padron Elementary School, the school got a lot of attention from the press and designers around the country for its unique designs and architectural challenges. The construction teams working on this building needed to be the highest caliber in order to meet the high demands of building such a first class facility. FSG was tasked with providing complete electrical construction services on the project.

SOLUTION

For this project, FSG relied on its years of experience in the electrical construction business. Coupled with its strong purchasing relationships, FSG was truly a force to be reckoned with. Providing a range of services including design, electrical engineering, installation, and final electrical finishing, FSG was able to deliver a top-notch project to the GC and Austin ISD.

RESULT

In the end the school opened to much praise from the community and FSG was able to play a role in bringing this first class educational facility on-line for a group of very excited students and employees!
