### TECHNOLOGY CASE STUDY

FSG Relationship with Northside ISD Ensures Technology Upgrades for District Facilities

#### CHALLENGE

As the fourth-largest school district in Texas—with 110 campuses and rapid growth pushing it toward the #3 spot—Northside ISD needed a trusted partner to support its growing technological demands. Maintaining secure, reliable networking systems across such a large district called for a professional provider capable of rapid response and high-quality work.

#### SOLUTION

In 2018, FSG San Antonio, in collaboration with Tero Technologies, was awarded the MAC (Moving / Adding / Changing) Telecommunications Cabling contract. FSG provides district-wide structured cabling and data networking services. Each project begins with a site survey, followed by custom-designed solutions by Tero, ensuring optimal setups for voice, data, video, and security systems. FSG's technicians bring a personal commitment to quality—many have children attending the schools they serve.

#### RESULT

FSG and Northside ISD have developed a strong, ongoing partnership rooted in trust and shared purpose. As the district continues to expand, FSG remains a reliable ally, supporting Northside ISD's mission to deliver top-tier educational opportunities through robust technology infrastructure.
