

DRISCOLL CHILDREN'S HOSPITAL

Corpus Christi, TX

ELECTRICAL CONSTRUCTION CASE STUDY

FSG supported critical infrastructure for DCH's healthcare expansion with seamless integration of essential electrical services.

CHALLENGE

Expanding hospital capacity in a live environment requires careful coordination to avoid service disruptions and ensure life safety. The North Pavilion addition called for significant infrastructure upgrades while keeping core medical services operational.

SOLUTION

FSG worked with Fulton Construction to implement electrical systems that supported surgical suites, patient care rooms, and medical imaging equipment. Backup power solutions and hospital-grade wiring were incorporated throughout the facility.

RESULT

The project was delivered with zero interruptions to hospital operations. FSG's dependable systems contributed to a safe, functional, and scalable healthcare facility now serving the Corpus Christi region.
